

We have loved continuing to learn 'Active Planet' which acuminated in us making and erupting our own school-made volcanoes. We observed the chemical reaction between bicarbonate soda and vinegar along with making quite a bit of mess!

This term we have been studying different religious festivals and the role light plays in them. We focused on Diwali and enjoyed a special day in school where we made Diva Lights and performed a modern Indian-styled dance.

One of our term's highlights has been to grow in confidence and knowledge while learning about magnets. They looked at how we use magnets in real life as well as running hands-on investigations into magnetic materials.

Our Parents/Carers were so proud of how the we performed as a choir in our Y3 & 4 Christmas show, 'Sulky Santa and the Boy who Didn't Believe'. We enjoyed entertaining our sell-out audiences for both shows. Thank you for your support!
