

I really enjoyed taking part in astronaut training. We did so many activities, which helped us learn what astronaut life is really like! We had to get into launch position ready for take-off and do puzzles wearing space gloves!

I have enjoyed learning all about space in our topic. We pretended to be the planets to learn about their orbits and remember their names.

I enjoyed having a go at archery while we were learning about Robin Hood. But I think I need a bit more practice!
