

It has been a fun filled term! We had previously been sent a special package that contained many different clues to what our commencing topic would be. Reception kick started their learning by sharing all the different facts they knew about our new topic of Space.

In each class, we created a thought shower of all our knowledge to collaborative and combine our ideas. We were very curious and asked lots of questions. We decided to use our thought shower to help us further investigate what we wanted to learn more about.

We had a special visitor that came in to speak to us about oral hygiene and why brushing our teeth is very important. We were such fabulous listeners, that we were each gifted a goodie bag to practise our unbeatable brushing skills at home.

We were incredibly lucky to have different visitors speak to us about their country of origin.

We worked hard to impress our visiting parents by singing a children's song in Polish. We were very confident as we were all able to say 'small frog' in Polish.

The excitement did not end, as we invited family members and their friend to share with us the fascinating landscape and culture of St Vincent and the Grenadines. We learnt all about the volcano, how to say phrases in Creole and showed off our dance moves as we 'showed our motion'!

We finished our final week with a very special visitor who came in to speak to us about Chinese New Year. We were brilliant as we demonstrated the Chinese tradition and etiquette of using two hands and saying our thanks as we each received our red packets. We most certainly welcomed the new year with light and prosperity!
