

Year 1's Term 3 Best Bits!

We planted different flowers and vegetables in our outdoor area! We can't wait to see how they look and taste in the summer.

This term we used the Bee-Bots in Computing. They were SO much fun!

After putting on our coats and exploring the flower meadow for leaves, twigs and grass we created our very own pictures. We really enjoyed using natural resources.

This term we have learnt all about butterflies! We made our own and made sure they were symmetrical.

Did you know... there are more female butterflies than male!

Look what we found! We went on a minibeast hunt and found worms, woodlice, snails and slugs!
