

### Year 3 Term 3's Best Bits

We have thoroughly enjoyed learning about *Inventions That Changed the World* this term. We have also thoroughly enjoyed exploring the texts *George's Marvellous Medicine* and *Fly Eagle Fly*.

We had a brilliant visit from Dr. Carr, who is a lecturer at Plymouth University. She came to talk to us about how modern inventions are helping junior amputees across the country and also gave us an introduction to human anatomy.

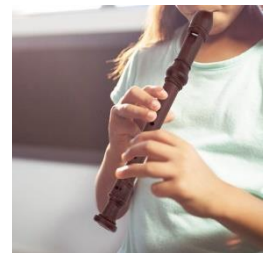

In English, we have been inspired by the African tale *Fly eagle Fly*. It is an inspiring and uplifting tale of fulfilment and freedom, brought to life by some stunning illustrations. We were challenged to retell the story from the bird's perspective and produced some powerful pieces of writing that we are very proud of. We also loved meeting some real life chickens to help our understanding of the book. Most of us had not held a chicken before so we were really EGGexcited and used a lot of endurance to be successful!

In Maths, we have been looking at multiplication. We have focused on being able to recall our times tables facts. We have found that some tables are more tricky to remember than others so perseverance is the key - we won't give up!

We are becoming confident musicians through our weekly recorder sessions. We have also had the opportunity to explore the music of *Queen*, *Dolly Parton* and *Vanilla Ice* as we have begun to identify the pulse within songs.

In PE we have been head over heels for gymnastics as we have been working on our core muscles, balance, trying new skills and collaborating with each other. What a fun term it has been! We cannot wait for Term 4!!
