

## Year 5's Best Bits

This term, we have been learning all about Ancient Greece! We have found out all about Greek Gods and Goddesses and made social media profiles for them too!

We read some famous Greek myths, and even wrote our own version of Theseus and the Minotaur. We have finished the term by interviewing Alexander the Great, perhaps Greece's most famous ruler, and experiencing our very own Greek experience day!

In PE, we have been finding out about different types of races and running styles for our athletics unit, while trying new warm ups (including a playground litter-picking race for

5TM).

In our English we studied the short film, "The Alchemist's Letter" where we had a debate over the motion "Wealth is more important than family".

We found out lots more about algorithms and programming by directing Beebots through our very own Minotaur's maze. While in science, we tested solubility and

even got to act out being particles in a solid, liquid or gas while learning about changing states!

What an exciting term!
