

Year 5 Term 4 Best Bits!

In term 4, Year 5 have enjoyed a range of spectacular activities.

We went on a trip to MAP secondary, where we got to create magical potions and make our own jumping frogs. It was very exciting to experience what a secondary school science lab is like and take part in such amazing experiments.

We really enjoyed World Book Day because we got to dress up as our favourite characters and see our friends in their costumes too!

One of our favourite parts of the term was welcoming some friendly French visitors to our fantastic school. We worked together to make some Roman aqueducts, then tested them with real water!

We found out about the Pompeii disaster of 79AD and wrote our own newspaper reports about the catastrophe in our English learning. In order to launch this unit, we conducted some explosive experiments including: coke and Mentos; bath bombs and bicarb and vinegar. We also had fun completing the trials of Nevermoor when we launched our Morrigan Crow topic in English.

This term we had 2 full days of amazing experiences for British Science Week. We got to dissect a real squid with visitors from the National Marine Aquarium as well as taking part in a range of activities and scientific experiments all around the school.

5TM have been watching the Blue Planet Live series and finding out about the effects of plastic pollution on the sea environments both locally, and worldwide.
