

Year 4 - Term 5 Best Bits

Wow! What a busy and eventful term this has been! We have thoroughly enjoyed experimenting and finding out about our new topic **Bright Sparks!**

We kick started this topic by going down to the solar panel farm and finding out about how electricity is generated. We worked with the local community and were even shocked at the size of the solar panel farm.

In English, we started looking at play scripts and focused on the story of *Fantastic Mr Fox*. We worked hard to read and act out a short scene and even had the chance to perform to our parents. Boggis, Bunce or Bean? Which one was the meanest?

Linking to our topic **Bright Sparks**, we have had the challenge of creating our own lamps. We have used our scientific skills to create a circuit with a light bulb to attach to our lamp design. We have used different materials and sizes of bottles to investigate which lamp is the brightest. Would you like any of our lamps in your home?
