

Year 2's Term 1 Best Bits

We are now experts at making paper aeroplanes. We now know how to make a sturdy paper plane and also a boat that can float for Paddington. Quite a few of us would like to be engineers now!

We LOVED riding our bikes and scooters during our 'Wheelie Good Time' event, we even tackled an obstacle course! We started looking at how wheels and axles work.

In Maths this term we have been practice writing out numbers to 100, showing great perseverance even when we found it tricky. With lots of practice, we are now becoming number ninjas with our addition. With Mrs Little, we have been practicing our times tables and know are becoming mathematicians!

We really enjoyed our tour around Plymouth on a double decker bus stopping of and seeing Plymouths landmarks. We visited St Andrews Church and PIETY Mosque and learnt about how it is important to respect others culture and beliefs.

We were able to meet real firefighters and ask them all about their jobs. We learnt who to call if we find a fire and how to keep ourselves safe. Getting to see how we radiate heat on the thermal camera was fun!

In English this term we have read stories about Paddington Bear, looking at setting and character description and writing our own story about Paddington visiting Plymouth and getting into mischief! We have also read Meerkat Mail and learnt how to write letters and research different places around the world.

In Science this term, we have been looking at different materials. We discovered that gingerbread would not make a good boat because it dissolved. To find out what would make a good boat, we investigated different materials and then used this to design and create our own boats!
