

## Year 3 - Term 2 Best Bits!

We have really enjoyed continuing to learn all about our 'Active Planet.' The children were very excited to share their own 'erupting volcanoes' with you, having great fun observing the chemical reaction between bicarbonate soda and vinegar, which made quite a bit of mess!

Another of this term's highlights has been making our wormeries. To make our wormeries, we used soil, sand, leaves and collected some worms, which made for some very interesting observations! We have learnt all about how fossils are formed and have investigated what our soil is made of.

During Geography and History lessons, we have learnt about the devastating effects natural disasters, such as earthquakes and volcanic eruptions can have. We created our own timeline to document the dramatic events of Pompeii. We have also learnt how to use a compass and where the major cities are in the UK.

This term, we have also been lucky enough to sample some fantastic Christmas cake entries for our Family Homework competition. Thank you to everyone who took part!

Our Parents/Carers and teachers were so proud of how we performed as a choir in our Y3 & 4 Christmas show, 'Gimme, Gimme, Gimme!'. We enjoyed entertaining our sell-out audiences for both shows. Thank you for your support!
