

Year 4 - Term 2 Best Bits!

We have loved continuing to learn about 'What's on the Menu' focusing on different crops and how they are grown. We designed and created our own economical food packaging for Farmer Sam and tested them with crops he sent us. We then shared them via facetime and blew Farmer Sam away with our finished products.

This term, we have learnt about the Mayflower and the conditions the passengers would have had to endure on their long voyage. To help us understand this journey, we relived the experience by huddling under our classroom tables. We even tasted some original 'ship biscuits' which the passengers on the Mayflower would have eaten. They were very hard and crunchy as they needed to last the journey.

Our Science investigation was by far one of our favourite highlights this term as we learnt all about our digestive system. We collaborated fantastically and can now recall the process of our digestive system. It was very messy but fantastic fun!
