

Term 3: Pre-School's Best Bits

WOW, what a term we have had in Pre-School. 'A land before time', has been full of awe and wonder. We have had so many exciting opportunities. Where can we begin...

Do you know where fossils are found? We have been developing our vocabulary in Pre-School. It was great fun learning about fossils, we even made our own. The children took on the role of an Archiologist, digging for fossils in the sand.

Can you name the food that Stone Age people ate? We used playdough to create food that was eaten by 'cave people'. Once we all understood, how to stay safe around a fire. We enjoyed visiting the fire pit and eating toasted marshmallows.

Did you know that a chicken is the closet living animal to a dinosaur! Well Chris the animal man taught us that fact. He also brought a wide range of reptiles to visit us in Pre-School. What an amazing experience it was to hold a python and stroking lizards.

Going back in time has helped us to realise how much the world has changed. We can't wait to begin our next topic, 'Tingling Taste buds'. We will be tasting new and exciting foods from around the world.
