

## Year 1's Term 3 Best Bits!

Look what we found! We went on a minibeast hunt in our outdoor area and investigated the habitats in our surroundings. We found woodlice, snails, slugs and even some spiders!

This term we planted our own beanstalks and learnt how to look after them. They have grown so big that we needed to take them home and re-plant them!

We have been learning all about butterflies, so we made our own. We were able to make links in our learning label the parts of the butterfly's body.

We heard back from the zoo! We were visited by 'Owlultimate Experience' where we were able to meet and greet a range of exciting animals. We were also lucky enough to meet some minibeast and learn some cool facts about them. Did you know that a death beetle can play dead for up to 8 hours?
